Getty Images The Colts could draft a quarterback in the first round of this year's draft, but the way to find out if they're right is for Andrew Luck to get the ball and drive the right direction. Michael Lombardi of the NFL Network reports that Luck, who has been dealing with a nagging shoulder injury, is scheduled to start throwing again on Monday. One of the most intriguing quarterbacks of the 2014 draft class is Teddy Bridgewater of Louisville, and the Colts will have a chance to evaluate him closely if Luck is unable to go. In three starts as a rookie, Bridgewater has completed 60.9 percent of his passes for 813 yards, seven touchdowns and three interceptions. If Luck is unable to play, the Colts will be able to schedule a workout with Bridgewater, and the Colts could draft him if Luck is healthy and he's available when they pick. A Bizarre New Species of Dye-Blind Butterfly Has Long Nose, Short Body and No Wings at All Walking through the woods with a butterfly net, it was probably no surprise to the man and woman taking in the fresh air that they could find something rare—a brand-new species of butterfly in New Hampshire. What the Canadian researchers saw, however, was a little different from most of the two dozen different species of butterflies that have been named to date. After setting up their net, they noticed that the creature that had landed on the mesh was clearly not a typical butterfly. It was also missing a tail. As the pair marveled at the oddity, they realized they were in the middle of New Hampshire's Portsmouth Islands National Historical Park, and the butterfly could only be the 8-centimeter (3-inch)-long 82157476af
